DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 2 and 3 have been considered but are moot in view of the new ground(s) of rejection. ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Routledge (U.S. 4,619,578).

With respect to claim 2, Routledge discloses a self-propelled vehicle for performing support or service work on airplanes comprising a self-propelled vehicle having a bottom (bottom of frame 12), a set of wheels (19) movably disposed in a first position on the vehicle (position of the vehicle in figure 2), a first distance between the bottom of the vehicle and a surface o/a which the vehicle is supported, a second distance between the bottom of the vehicle and the surface; the second distance formed by moving the set of wheels to a second position such that the vehicle is raised from the surface, wherein the second distance is substantially greater than the first distance (as best seen in figures 1 and 2, the distance between the bottom of the frame 12 and the ground in figure 1 is greater than the distance between the bottom of the frame 12 and the ground).

With respect to claims 3-4, Routledge disclose a vehicle comprising a bottom (bottom of frame 12) and a set of wheels 19) movably disposed between a first position (position of the vehicle as shown in figure 2) and a second position (position of the vehicle as shown in figure 1) with respect to the vehicle, wherein in the first position the set of wheels extend above the bottom of the vehicle and in the second position the set of wheels are lowered to extend under the bottom (figure 1 shows the set of wheels 19 extend under the bottom of frame 12) of the vehicle such that the vehicle is raised from a support surface supporting the vehicle; a tow bar (combination of 51 and 52) for towing the vehicle as a trailer.
